USER STORY

- As a user, I want to search for a product by name, so that I can quickly find the product I need.
- As a user, I want to see the same product listed across different platforms, so that I can compare its prices.
- As a user, I want to see the quantity or size of each product, so that I can make a fair price comparison.
- As a user, I want to see the product brand, so that I can ensure I am comparing the correct product.
- As a user, I want to see the current price of a product on each platform, so that I can identify the cheapest option.
- As a user, I want to see available discounts and offers, so that I can get the best possible deal.
- As a user, I want to see delivery charges, so that I can compare the actual cost of purchasing a product.
- As a user, I want the application to calculate the final payable amount, so that I know how much I will actually spend.
- As a user, I want the application to highlight the cheapest option, so that I can quickly choose the best deal.
- As a user, I want to see whether a product is currently available, so that I do not select an unavailable option.
- As a user, I want to sort products by price, so that I can easily find the lowest-priced option.
- As a user, I want to filter results by platform, brand, and price range, so that I can narrow down my choices.
- As a user, I want to select multiple products for comparison, so that I can compare different products before purchasing.
- As a user, I want to view product details from the selected platform, so that I can make an informed purchasing decision.
- As a user, I want to select my location, so that I can see prices and availability relevant to my area.
- As a user, I want to see when the price was last updated, so that I know whether the displayed price is recent.
- As a user, I want to view the price history of a product, so that I can understand how its price has changed over time.
- As a user, I want to save products to my wishlist, so that I can monitor products I frequently purchase.
- As a user, I want to receive a notification when the price of a saved product drops, so that I can purchase it at a better price.
- As a user, I want to compare products based on price per unit, so that I can identify the better value for money.
- As a user, I want the application to recognize differently named listings of the same product, so that I get accurate results.
- As a user, I want to see products from multiple platforms in one comparison view, so that I do not have to check multiple websites.

As a user, I want to open the selected product on the original platform, so that I can complete my purchase there.

As a user, I want to see my recent searches, so that I can quickly access products I previously searched for.

As a user, I want the application to recommend the best overall deal considering price, discount, delivery charge, .
